OSLO AT A GLANCE

Impressively beautiful and modern, Oslo is considered a global city and ranked number one in terms of quality of life among European large cities. Oslo has an estimated 3.2 million total population. Norway's immigration policy is causing Oslo to be the fastest growing city in Europe. As an industrial and commercial hub, it is both an economic and political player.

There is great need in Oslo for God to break through spiritual darkness and there is great opportunity for God to use a new English-speaking church to be a part of that breakthrough.
